New Jersey Wire Stitching Machine Company has achieved a reputation for excellence in manufacturing during our 100 year history. Over that time period, we have designed, built and supplied more than 250 types of high quality, power-driven wire stitching and bag closing machinery, now used worldwide in a variety of applications.

As a subsidiary of Precision Automation® Company, Inc., a leader in the field of production automation machinery, New Jersey Wire Stitching Machine Company provides wire stitchers for cardboard, metal, textile fabrics, plastics, and many other types of packaging. Wire stitches are used in a variety of applications including:

- corrugated boxes
- air filters
- drawstring bags
- match books
- retail display packaging (for gloves, novelties, air fresheners and other items)
- apparel (for belts, handbags and hats)
- flags
- lampshades
- coil forms
- electronics
- radio assemblies
- solderless connections

Our customers have learned to count on the reliability of New Jersey Wire Stitching machines. Because of their simple design and rugged construction, our machines are extremely durable and require little maintenance.

Should your machine ever require repairs, our extensive dealer network will promptly provide parts and service, ensuring that your production will be back on-line as soon as possible. In addition, spare parts and wire supplies can be ordered directly from us using our Internet ordering system.
